Universiti Teknologi Malaysia (UTM)

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Welcome to UTMxHackathon'26!

This document presents 2 case studies across the domains of Agriculture and Retail.

Select **ONLY ONE** to solve, and remember to clearly state your chosen case study during your presentation.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Case Study 1:

Precision Urban Agriculture for Vertical Farming (IoT System/ Web Dashboard/ Mobile Application)

1. Introduction

Rapid urbanization, shrinking arable land, and climate change are putting immense pressure on traditional food supply chains. In densely populated areas, food security and the carbon footprint of transporting produce are growing concerns. Vertical farming offers a space-efficient, sustainable alternative by growing crops in stacked layers within controlled indoor environments, making it possible to produce food directly within city limits

2. Problem Statement

Managing a vertical farm manually is highly resource-intensive and prone to human error. Inconsistent lighting, improper nutrient delivery, and fluctuating climate control can quickly lead to suboptimal crop yields, crop disease, wasted water, and excessively high energy consumption. Currently, many urban farmers and hobbyists lack access to affordable, data-driven automation tools needed to precisely monitor and optimize plant growth around the clock.

3. Challenge

Develop an intelligent, automated system that monitors and manages the environmental variables of an indoor vertical farming setup in real-time. The platform should collect sensor data, automate routine agricultural tasks, and provide actionable, data-driven insights to help users maximize crop yield while strictly minimizing water and electricity usage. It should be scalable enough for a small community garden or an indoor campus greenhouse.

4. What the solution should solve

Participants can build a working hardware prototype (optional) paired with a software dashboard. Key features could include:

- Real-time monitoring using sensors for temperature, ambient humidity, soil moisture, and water pH levels.
- Automated control systems to adjust LED lighting spectrums, activate cooling fans, or trigger hydroponic water pumps based on specific plant profiles.
- A centralized web or mobile dashboard that visualizes growth metrics, resource consumption, and historical data trends.
- Predictive alerts that notify users of system anomalies, such as a water reservoir running dry or temperatures exceeding safe thresholds.
- An AI-driven recommendation engine that suggests optimal harvest times or adjustments to nutrient mixtures based on sensor inputs.

Area	Tools
Hardware / IoT	Arduino, ESP32, Raspberry Pi, Soil Moisture/pH Sensors
Backend	Node.js, Python (Flask/FastAPI), Firebase, Supabase
Frontend	React, Vue.js, Flutter, React Native
Data/AI	TensorFlow Lite, Scikit-learn, OpenAI API for crop insights
Communication	MQTT, WebSockets, REST APIs

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

The solution should be:

- A functional hardware (optional) and software prototype demonstrating real-world data collection.
- Interactive and user-friendly, allowing individuals without deep agricultural expertise to manage a system.
- Scalable to adapt to different types of crops or larger vertical farming racks

Note: The features and tools listed above are provided as guidance only. Participants are strongly encouraged to explore alternative approaches that meaningfully address the problem statement.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Case Study 2: The Youth Resilience Challenge

1. Introduction

Despite high internet penetration, a significant portion of Malaysian tertiary students and fresh graduates fall into debt traps early in their careers or find it hard to manage their budgets for future planning (e.g. saving and investing). While current banking tools provide transactional data, they largely lack the capacity for proactive, actionable intervention. This challenge invites participants to explore how technology can make "Financial Resilience" the default setting for a student's / early graduate's lifestyle, using GXBank's products as the foundational tool, can make financial resilience a default behaviour for students and early-career graduates, rather than an afterthought. Please feel free to recommend campaign ideas and/or new features to help this generation build positive financial habits

2. Problem Statement

How can we leverage AI and behavioural economics to transform banking / savings habits from a passive storage of funds into an active, automated habit-builder that prevents debt accumulation among Malaysian youth?

3. Challenge

Design and build a solution that bridges the gap between financial awareness and consistent financial action for the next generation of Malaysian savers. The solution should go beyond data presentation and actively guide users toward healthier financial behaviour.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Participants are expected to consider:

- How behavioural nudges (e.g. spending alerts, savings streaks, milestone rewards) can be embedded into daily banking interactions
- How AI can analyse spending patterns to generate personalised, context-aware financial guidance
- How automated savings mechanisms (e.g. round-up savings, salary-triggered transfers) can reduce reliance on user discipline
- How gamification or social accountability features could encourage long-term habit formation among the target demographic
- How the solution integrates with or proposes enhancements to existing GXBank product features

The solution may take the form of a mobile application, a feature concept with a working prototype, a campaign proposal supported by a functional demo, or any combination thereof. Proposals for new features or campaigns within the GXBank platform are also welcome.

Note: The examples above are provided as starting points.

Participants are encouraged to propose original, well-reasoned approaches that genuinely address the problem statement.

.

UTMxHackathon'26

RuleBook

MARCH 2026

ISSUED BY

Persatuan Mahasiswa Sains Komputer (PERSAKA),
Universiti Teknologi Malaysia (UTM)

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Welcome to UTMxHackathon'26, a celebration of innovation, teamwork, and problem-solving. This rulebook is designed to ensure a fair, inclusive, and inspiring environment where participants can focus on creating impactful solutions. By outlining the guidelines and expectations, we aim to foster respect, transparency, and collaboration throughout the event. Every participant, mentor, and organizer plays a role in upholding these standards, so that together we can make this hackathon a rewarding experience for all.

Introduction

The UTMxHackathon'26 serves as a strategic platform for students to develop technology-driven solutions for authentic, real-world problems. The participants in the competition need to collaborate for solving complex challenges while they build accurate prototypes and present their solutions during the competition. This event is created to boost critical thinking skills and creative skills in participants who will work together to build socially beneficial technology.

The hackathon has one main goal which aims to create an environment that supports innovation while students demonstrate their technical skills by building working models. The participants will study a case study which demonstrates current technological and social challenges; their mission is to find main problems and develop solutions which can be implemented at scale. The Koo'Q system functions as the official event platform which requires all submissions to use its submission process. Teams need to provide a GitHub repository link which contains their prototype along with a 5-minute demonstration video that must be published on YouTube as public or unlisted content.

The event will proceed with key milestones which include the online Preliminary Round scheduled from 4 to 11 May 2026 and the top 10 finalists announcement on 15 May 2026 and the Grand Finale which will take place at Universiti Teknologi Malaysia in Johor Bahru on 23 May 2026.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Eligibility

Each student must fulfill all the requirements in order to be eligible for the competition.

- a. Participants must be at least 18 years old.
- b. Participants may be from pre-undergraduate or undergraduate programs.
- c. Participants must be enrolled in local universities, whether public or private.
- d. Organisers, judges, sponsors, or individuals in any other privileged positions of the event are ineligible.

Team Composition

- a. A team may consist of **1-5** member(s).
- b. Participants are responsible for finding their own team member(s).
- c. Teams may comprise participants from the same university or different universities.
- d. Each person may only participate as a member in exactly **one (1)** group. Cross-team memberships are **not allowed** & may be **disqualified**.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Hackathon Structure

UTMxHackathon'26 is structured into **two main phases**, the **Preliminary Round** and the **Grand Finale**. This structure is designed to ensure a systematic progression from solution development to final evaluation, while maintaining fairness and competitiveness throughout the event.

1. Preliminary Round (Online Phase)

The Preliminary Round serves as the **initial evaluation and development stage**, where all registered teams participate. This phase is conducted fully online within the designated period from **4 May 2026 to 11 May 2026**.

At the beginning of this phase, participants will attend an **Opening Ceremony and Briefing Session**, followed by the **reveal of the case study**, which outlines the problem statement to be addressed.

During this phase, teams are required to:

- Develop a **high-fidelity prototype** based on the given case study
- Ensure that all work is completed within the competition period
- Participate in any **mentorship sessions or workshops** provided to support solution development

At the end of the development period, teams must submit their solutions through the designated platform. The required submission components include:

- A **GitHub repository link** containing the developed prototype
- A **5-minute demonstration video** explaining the solution

All submissions must be completed before the **deadline (11 May 2026, 10:00 PM)**. Late or incomplete submissions will not be accepted.

Following the evaluation process, only the **top 10 teams** will be shortlisted and announced as finalists on **15 May 2026***.

*subject to change by UTMxHackathon'26 organising committee

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

2. Grand Finale (Final Evaluation Phase)

The Grand Finale represents the **final stage of the competition**, where shortlisted teams compete for the final rankings. This phase will be conducted **physically at Universiti Teknologi Malaysia (UTM), Johor Bahru on 23 May 2026**.

All finalists are required to be physically present at the venue. Failure to attend will result in **disqualification**, and replacement may be made based on eligibility.

During the Grand Finale, teams are required to:

- Deliver a **10-minute pitching presentation**
- Demonstrate their prototype to judges
- Present supporting materials such as **slides, posters, or demonstration media**
- Answer questions during a **5-minute QnA session**

In addition, an **exhibition session** will be conducted, allowing teams to showcase their solutions and interact with judges and attendees.

The event concludes with the **evaluation, award determination, and closing ceremony**, where winners are officially announced.

Submission Guidelines

All submissions for UTMxHackathon'26 will be done via the Koo'Q system. Submissions via any other platforms will be disregarded. For the preliminary round, each team is required to submit (one submission per team):

- a. A Github link of your prototype
- b. A Youtube link of your 5-minute presentation. Do ensure your video visibility is set to public/unlisted.

All submissions must be completed by **11 May 2026, 10:00 PM**, any submissions after the set due will not be tolerated.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Judging & Evaluation

a. Preliminary Round

During the Preliminary Round, all team submissions will be evaluated based on two main components: **Prototype** and **Short Video Presentation**. The assessment follows a structured rubric to ensure fairness and consistency.

1. Prototype Criteria

Teams will be assessed on the quality and effectiveness of their developed prototype, including:

- Overall appearance and design quality
- Creativity and level of innovation
- Functionality and usability of the solution
- Potential real-world impact, scalability, and sustainability
- Relevance of the solution to the identified problem and target users

2. Video presentation

Each team's 5-minute video will be evaluated based on:

- Clarity of introduction, problem statement, and proposed solution
- Demonstration of the prototype and its key features
- Explanation of target audience and market potential
- Presentation of technology architecture and system design
- Adherence to the specified video duration

All submissions will be reviewed by appointed judges, and scoring will be based on the defined rubric criteria. At the end of the evaluation process, **only the top 10 teams** with the highest overall scores will be selected to advance to the Grand Finale.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

Event Policies & Rules of Play

All participants are required to adhere to the official Terms and Conditions (T&Cs). The T&Cs provide comprehensive guidelines and regulations governing the event, including but not limited to:

- Code of Conduct
- Plagiarism and Originality Requirements
- Disqualification Conditions
- Technical and Operational Rules (Final Round)
- Tie-Breaking Procedures
- Amendments and Organiser Rights

For full details, please refer to the official T&Cs document:

[\[PRELIMINARY\] TERMS AND CONDITION UTMXHACKATHON'26 \(PARTICIPANTS\)](#)

Prizes & Prize Distribution

The UTMxHackathon'26 competition awards recognition and rewards to participants who demonstrate exceptional technical skills, innovative thinking and create projects with significant value. The total prize pool is shared among all registered members of a winning team, ensuring that the collaborative effort of every participant is acknowledged. The prizes exist as non-transferable awards which must be claimed by their respective designated winners.

The winner selection process uses total scores which judges assigned during both Preliminary Round and Grand Finale assessments. Grand Finale award eligibility requires shortlisted teams to attend the event at UTM Johor Bahru; teams that fail to show up will face immediate disqualification which will allow the next qualified team to take their place. The judges and organizing committee possess complete authority to make final decisions regarding winner selection and prize distribution. The results of this process cannot be challenged through any method of dispute resolution.

UTMxHackathon'26

Rubric Sheet (Preliminary)

MARCH 2026

ISSUED BY

Persatuan Mahasiswa Sains Komputer (PERSAKA),
Universiti Teknologi Malaysia (UTM)

This document outlines the official evaluation rubric for UTMxHackathon'26. All submissions, regardless of the chosen case study, will be assessed against a single unified set of criteria

SHORT VIDEO

Element	Excellent (8-10)	Average (5-7)	Satisfactory (0-4)
Introduction and Problem Statement	Clearly introduces the theme with sufficient background and evidence of the current issues. The solution idea is well-defined and supported by relevant sources.	Presents the introduction and problem statement with some relevant background information. The solution idea is clear but lacks depth or supporting sources.	Introduction, problem statement, and solution idea are unclear or lack relevance to the theme.
Product Demonstration	Clearly demonstrates how the solution addresses the identified problem. Prototype effectively handles essential functionalities with smooth execution.	Prototype is demonstrated with relevant features, but lacks thorough explanation in some areas.	Prototype's functionality is not effectively demonstrated or does not relate well to the identified problem.
Marketing	Clearly identifies and explains the target audience and market fit of the solution. Demonstrates commercial potential.	Identifies a target audience and market fit, but explanation lacks depth or supporting data.	Target audience and market fit are unclear or do not align with the solution.
Technology Architecture	Presents a well-structured technology architecture, scalable and flexible for future enhancements. The explanation is clear and detailed.	Provides a basic technology architecture with some explanation, but scalability is not well discussed.	Technology architecture is unclear, incomplete, or not suitable for the solution.
Video Duration	The video is within 5 minutes.	Video exceeds the time limit by less than one minute.	Video is significantly shorter or longer than the specified time range.

PROTOTYPE

Element	Excellent (8-10)	Average (5-7)	Satisfactory (0-4)
Overall Appearance	The prototype is well-built, visually appealing, and demonstrates strong craftsmanship using available tools and resources.	The prototype is adequately assembled with some attention to detail, though minor improvements are needed.	Prototype is poorly built with rough edges, lack of organization, or appears unfinished.
Creativity/Innovation	Introduces a novel idea or a significant improvement to existing solutions, demonstrating strong innovation.	Shows moderate innovation with some enhancements to existing solutions.	Lacks innovation or is a direct replication of existing solutions.
Functionality	Prototype fully meets the requirements of the selected theme, is intuitive, and integrates components seamlessly.	Prototype meets some requirements but has usability or integration issues.	Prototype does not function effectively, lacks usability, or fails to meet key requirements.
Impact	Demonstrates high potential for real-world impact, scalability, and sustainability in solving the problem.	Shows some potential impact but lacks thorough consideration of scalability or sustainability.	Impact, scalability, and sustainability are unclear or not well considered.
Relevance to Audience	Solution effectively addresses a meaningful problem, demonstrating strong real-world applicability.	Addresses a relevant problem but may be limited in scope or audience impact.	Solution lacks clear relevance or does not effectively solve a real-world problem.

UTMxHackathon'26

Terms and Conditions (Participants)

MARCH 2026

ISSUED BY

Persatuan Mahasiswa Sains Komputer (PERSAKA),
Universiti Teknologi Malaysia (UTM)

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

By registering to participate in **UTMxHackathon'26**, you agree to the following rules and regulations of this competition.

A. ELIGIBILITY

1. Participants must be at least 18 years old and be pre-undergraduate or undergraduate students enrolled in local universities, whether public or private. We reserve the right to verify your undergraduate status at any time by requesting your student card.
2. Organisers, judges, sponsors, or individuals in any other privileged positions of the event are ineligible.

B. REGISTRATION AND PARTICIPATION

1. All teams must complete the registration process starting from **5 March 2026** until **30 April 2026** via **Koo'Q**. Requests for team modifications after registration submission will not be permitted.
2. Participants shall ensure that the personal information provided upon team registration online is true and accurate with no liability to the **UTMxHackathon '26** Organiser in case of inaccuracy. No late submissions will be accepted and any incomplete, false, erroneous, fraudulent, forged, or tampered forms will not be considered.
3. Teams may consist of a maximum of **five (5)** participants. (Note: Participants are responsible for finding team members on their own).
4. Teams may comprise participants from the same university or different universities.
5. Registration is free and open to all Undergraduate and pre-undergraduate IPT students.
6. All participants must **attend** all sessions held throughout the hackathon.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

7. There is no restriction on the number of participants or teams for the Preliminary Rounds. However, only **10 teams** will be selected to advance to the **Grand Finale**.
8. Any kind of tampering with the competition's registration, flow and/or result in any way will result in participants being banned and disqualified from the competition.
9. All participants, competitors, judges, speakers and program partners must be treated with mutual respect and courtesy.

C. MODE OF EXECUTION

1. The Briefing Session and Case Study Reveal will be conducted online on **4 May 2026**. The tentative schedule of the program can be referred to in Appendix 3.
2. The competition consists of two phases: the Preliminary Round and the Grand Finale.
3. Participants will be given time from **4 May 2026** to **11 May 2026**, to develop their prototype. The final submission deadline is **11 May 2026, at 10:00 PM**. Late submissions will not be entertained.
4. The announcement of the top 10 finalists will be on **15 May 2026**.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

D. SUBMISSIONS

1. Participants may submit their work during the prototype development period via the **Koo'Q** System that will be revealed at a later stage.
2. The submitted solution must be related to the case study selected by the team.
3. The submitted solution for the Preliminary Round includes a **Github link for a high fidelity prototype** and a **5-minute demonstration video**. The sample of submission materials can be referred to in Appendix 1 and Appendix 2 respectively.
4. All work on the solution must be done throughout the **UTMxHackathon'26** event.
5. The submission and all components thereof must be the participant's original product. However, appropriate referencing to current available solutions is allowed.
6. Participants are not allowed to plagiarise the ideas of other participants or existing products.
7. All submissions must be within the stated deadline. Any incomplete, illegible, misdirected or late submissions will not be considered.
8. Any submissions that are considered (in the absolute discretion of the organisers) to be dangerous, vulgar, offensive, indecent, illegal, racist, plagiarised, or fraudulent, or infringe on the rights or copyright of others will be immediately disqualified.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

E. INTELLECTUAL PROPERTY AND PUBLICITY RIGHTS

1. All submissions made for **UTMxHackathon'26** shall become the property of **UTMxHackathon'26** upon submission.
2. By participating, participants agree that the organisers reserve the right to use, reproduce, modify, adapt, publish, translate, distribute, and display the submitted work, in whole or in part, for promotional, educational, or any other purposes without further compensation or prior notice.
3. Participants retain the right to be acknowledged as the original creators of their work. However, they grant **UTMxHackathon'26** a non-exclusive, worldwide, royalty-free license to use the submitted materials.

F. JUDGING AND EVALUATION

1. Projects will be evaluated based on predefined criteria, including innovation, creativity, functionality, design impact, and presentation.
2. The decision of the judges is final and cannot be contested.

UTM
UNIVERSITI TEKNOLOGI MALAYSIA

PERSAKA
PERSATUAN MAHASISWA SAINS KOMPUTER

G. CODE OF CONDUCT

1. All attendees, sponsors, partners, committee of **UTMxHackathon'26** are required to agree with the following code of conduct. Organizers will enforce this code throughout the event. We expect cooperation from all participants to ensure a safe environment for everybody.
2. Our hackathon provides a safe and comfortable environment and harassment-free experience for everyone, regardless of the regardless of gender, gender identity and expression, age, sexual orientation, disability, physical appearance, body size, race, ethnicity, nationality, religion, political views, previous hackathon experience or lack of, or field.
3. We do not tolerate harassment of hackathon participants in any form. Sexual language and imagery are not appropriate at any hackathon venue, this includes the submissions, sessions, presentations, or demos, workshops, any parties associated with the hackathon, social media or any other online media.
4. We hereby explicitly note that the submissions created at **UTMxHackathon'26** are equally subject to the anti-harassment policy. If you are being harassed, notice that someone else is being harassed, or have any other concerns, please contact any of the committee members immediately.
5. Hackathon participants violating these rules may be sanctioned or expelled from the hackathon at the discretion of the **UTMxHackathon'26** organisers. Participants are encouraged to report any violation to these rules to the organisers immediately so appropriate actions could be taken as soon as possible.

H. LIABILITY

1. The **UTMxHackathon'26** Organizing Committee reserves the right to modify the rules and regulations without prior notice. Participants hold the responsibility to constantly check the rules and regulations and communication channels for updates.
2. The Organizing Committee reserves the right, at their sole discretion, to eliminate or disqualify any participants or teams regarded as being in breach of these rules and regulations.
3. Participation in this hackathon is at the participant's sole risk. To the extent permitted by law, the Organizing Committee will not accept any responsibility for any damage, loss, liabilities, injury, costs, expenses or claims suffered by participants or any third parties arising out of or in connection with the competition and/or accepting a prize.

I. DATA PROTECTION

1. Any personal information that participants share with the **UTMxHackathon'26** Organizing Committee will be kept secure and only used in line with these rules and regulations (such as participant identification) unless the consent has been given by the participants for specific purposes.
